

Opportunity Announcement:

Statistical Scientist **(Trial Design & Analysis – Job#23-01)**

About Berry Consultants:

Berry Consultants is a leading scientific consulting company specializing in complex and innovative clinical trial designs that address the largest challenges in the clinical trial sciences. As world-renowned experts in Bayesian methods, our statistical scientists seek to create innovative solutions that are customized to the unique challenges encountered across a wide range of diseases, populations, and therapeutic interventions. Berry Consultants has a passion to understand the rapidly progressing scientific and medical breakthroughs that improve patient care with a global client base that includes pharmaceutical, biotech, and medical device companies, as well as contract research organizations, non-profit patient advocacy groups, government organizations, and academic centers. See www.berryconsultants.com for additional information.

Description of Opportunity:

Berry Consultants is searching for Statistical Scientist(s) with a passion for using innovative statistical approaches to change the world. The successful applicant will play a key role in advancing clinical trial design and contributing to the evaluation of novel therapeutic interventions to improve global patient care.

The Statistical Scientist's Role Includes:

- Learn the underlying science, ask clinical and statistical questions, and identify key design issues for a given disease, population, and therapeutic intervention
- Application of customized Bayesian, adaptive, and other innovative statistical methods to solve challenging problems encountered in clinical trial design
- Coding of efficient and complex simulation programs/algorithms/models to understand and explain complex innovative trial designs
- Creation and presentation of accurate, concise, and engaging materials to both statistical and non-statistical audiences, including business leaders, regulatory groups, clinicians, trial steering/monitoring committees, and other statisticians
- Interaction, communication, & collaboration with enthusiastic teams of statistical & clinical experts both within and outside of Berry Consultants
- Showcase innovative statistical trial designs and solutions through peer-reviewed publications in both statistical and clinical journals

Qualifications & Essential Skills:

- PhD in Statistics or related quantitative field (exceptions are possible)
- Passion for statistics and science and a desire to have a positive impact
- Exceptional communication skills
- Outstanding statistical programming and modeling skills

Additional Desired Skills:

- General knowledge of clinical trials and biostatistics
- Experience with Bayesian analyses and relevant statistical software

Location:

This position is flexible. Berry Consultants' headquarters are in Austin, Texas.

Compensation:

Compensation is negotiable and will be based on qualifications. Competitive benefits including medical and dental insurance, 401K retirement plan, paid leave and holidays, professional development, and more are available.

Application Procedure:

Candidates should email a cover letter and resume to jobs@berryconsultants.com. In the cover letter, please describe why you think you would be a good fit for Berry Consultants and reference job #23-01. This position will remain open until filled and may be filled at any time.

Legal Notices:

Berry Consultants is an equal opportunity employer and does not discriminate against any employee or applicant on the basis of race, color, religion, sex, sexual orientation, age, national origin, or status as an individual with a disability or protected veteran.
